- Ten Outstanding Young Persons Award (2000)
- Ten Outstanding Young Digi Persons Award (2000)
- Hong Kong Top Ten Business Maker Award (2000)

Graduated with B.Sc. (Hons) in Computer Science from the University of Manchester, C.S. has more than 22 years of experience in the I.T. industry. He started his career as an engineer in Dataproducts Ltd. and held executive positions in Sun Hung Kai (China) Limited and Hewlett-Packard (Asia Pacific) Ltd. In 1991, C.S. founded C&T and successfully led the company to be listed on the main board of the Stock Exchange of Hong Kong in 1998.

C&T has successfully introduced many innovative I.T. solutions to the Mainland China and Hong Kong. Over the years, C&T has received numerous recognitions from the Government of the People's Republic of China (PRC) as well as international organizations including:

- being the first Hong Kong company awarded the "Excellent Systems Integrator" Certificate from the Gold Project's Office (a government organization focusing on national I.T. projects) of the former Ministry of Electronics Industry of PRC in 1996;
- selected as one of the "300 Best Small Public Listed Enterprise in the world" by the Forbes Magazine in 2000;
- received Enterprise Award at DHL/ South China Morning Post (SCMP) Hong Kong Business Awards 2001.

Feeling strongly the need of an organization representing the interests of the local I.T. industry, C.S. instigated the establishment of ISIA in 1999. Under his chairmanship, ISIA has not only proved its effectiveness in promoting the development of the local I.T. industry, but also been acting as the platform for experience sharing, partnership facilitation between Hong Kong and the Mainland China, as well as communications with the government. Besides, CS has been actively participating in a number of Government advisory boards and dedicating his effort in advocating aspects like:

- To share intellectual property right of the government I.T. systems with the related suppliers and the industry;
- To explore more business and employment opportunities through the Mainland and Hong Kong Closer Economic Partnership Arrangement (CEPA);
- To promote the adoption of professional qualification certifications among local I.T. professionals and I.T. organizations;
- To up-lift the project management quality of the HKSAR Government in managing large-scale IT project implementations.

C.S. is a frequent speaker in I.T. seminars and conferences in Hong Kong, Mainland China and overseas events. In 2002, he represented Hong Kong to make presentation in the "Asia-Pacific Economic Cooperation (APEC) Innovative Forum" held in Moscow, Russia regarding our innovative e-Government initiatives. At the "21st Century Digital City" Convention in Beijing in 2002, C.S. was an invited speaker to address over 100 mayors and senior government officers on the promotion of e-commerce in the new economy. C.S. was also the Vice-Chairman of the Organizing Committee of the Hong Kong International Computer Conference 2003, the annual premier event organized by Hong Kong Computer Society.
